

The miracles of science

PhD Scientists / Engineers (Entry Level)

Job Description:

DuPont is seeking entry level PhD scientists and engineers who have deep desire to work at the leading edge of scientific fields and technologies. Specific disciplines include polymer science and engineering, material science and engineering, inorganic chemistry, organic chemistry, analytical chemistry, ceramic science, chemical engineering, biology, biochemistry, biochemical engineering, microbial genetics, applied physics, mechanical engineering, metallurgy, and others, to further our global science and technology leadership in these areas.

At DuPont, our scientists and engineers are actively engaged in creating exciting new materials and sustainable solutions essential to a better, safer, healthier life for people everywhere. Our scientists and engineers work in research and development functions that range from basic and long term research supporting a variety of business platforms to mid and short term research for product development.

Company headquarters are in Wilmington, Delaware. These positions may be located at other geographic regions in the United States, and international locations, such as China, India, Canada and Mexico. DuPont offers a competitive salary and an outstanding benefits package. DuPont is an equal opportunity employer.

Qualifications:

Recent and new PhD graduates, and post-doctoral candidates in the sciences or engineering.

In the United States, some positions may require the right to work in the U.S. without restrictions. Preference will be given to US Citizens and Permanent Residents. At international locations, preference will be given to candidates who are willing to be relocated to those regions.

Application Instructions:

In order for your application to be considered, please complete the following step as described below:

Step 1: Submit resume to dupont@nc3.com

In the email subject, indicate “name of your school” – “discipline”
