

MATERIALS RESEARCH ENGINEER

Functional Ceramics

The Ceramics Branch of the Materials and Manufacturing Directorate, Air Force Research Laboratory, Wright-Patterson Air Force Base, Ohio is seeking an entry level materials scientist with an interest in functional ceramics. The individual will participate in the research and development of ceramic materials where their intrinsic properties - optical, thermal, electrical, dielectric and magnetic – will be exploited. Responsibilities include conducting in-house research and external contract R&D management.

Educational and/or work experience with synthesis, design, processing, characterization, and evaluation of functional ceramics is desired. An advanced degree in ceramic engineering or materials science is preferred. U.S. Citizenship is required.

For consideration, qualified candidates should submit resumes to michael.kinsella@wpafb.af.mil
