

Job Title: Polymer Chemist

Massachusetts Materials Research, Inc., a leader in commercial materials testing, is looking for a skilled person to work in our chemistry department. This full time, permanent position requires a minimum of a bachelor's degree in a technical discipline and the ability to perform analyses by FTIR, Thermal analysis (DSC, TGA) and/or Ion Chromatography and Inductively Coupled Plasma experience a plus. The ability to write clear and accurate technical reports and to interface with customers is also required. Preference will be given to those candidates with knowledge or experience in the testing of plastics, adhesives, elastomers, greases, paints and/or sealants. Salary will be commensurate with applicable experience. Massachusetts Materials Research provides competitive benefits, training, and an exceptional work atmosphere. Send resume to Fran Shoreys, Massachusetts Materials Research, Inc. 1500 Century Drive, West Boylston, MA 01583; (508) 835-9025 (fax) or email to fshoreys@massmaterials.com.
